UN Secretary-General Appoints Ms. Hanna S. Tetteh of Ghana as Director-General, United Nations Office at Nairobi (UNON)
United Nations Secretary-General António Guterres on 13 July 2018, announced the appointment of Hanna S. Tetteh of Ghana as Director-General of the United Nations Office at Nairobi (UNON). She succeeds Ms. Sahle-Work Zewde who has been appointed as Special Representative to the African Union and Head of the United Nations Office to the African Union (UNOAU).

Ms. Tetteh most recently served in the cabinet of the Government of Ghana as Minister for Foreign Affairs (January 2013-January 2017), and Minister for Trade and Industry (February 2009-January 2013). While serving as Minister for Foreign Affairs, she was also a member of the National Security Council and the Armed Forces Council. From 2014 to 2015 she was the Chairperson of the Council of Ministers of the Economic Community of West African States (ECOWAS). During her term as Minister for Trade and Industry, she was also a member of the Government's economic management team, a member of the board of the Millennium Development Authority, a member of the National Development Planning Commission, and was also the Chairperson of the Ghana Free Zones Board.

Beginning in December 2000 to January 2005, she served for one term as the National Democratic Congress (NDC) Member of Parliament for the Awutu Senya Constituency. She later returned to Parliament in January 2013 until January 2017 as the NDC Member of Parliament for the Awutu Senya West Constituency.

Ms. Tetteh is a practising Lawyer and holds a Bachelor of Laws (LLB) degree from the University of Ghana, Legon. She also completed her professional law course at the Ghana School of Law and was called to the Ghana Bar in October 1992.

Mr. Tamrat Samuel, Assistant Secretary-General and Senior Coordinator for Peace and Security Reform in the Executive Office of the Secretary-General, will serve as Acting Director-General until Ms. Tetteh assumes her position.

Ms. Tetteh most recently served in the cabinet of the Government of Ghana as Minister for Foreign Affairs (January 2013-January 2017), and Minister for Trade and Industry (February 2009-January 2013).
More than 350 pupils gathered with diplomats, government officials and business leaders on 18 July 2018 at the United Nations Office at Nairobi (UNON) to celebrate the life and legacy of Nelson Mandela on the occasion of the 100th anniversary of his birth.

The learners from various primary schools signed and delivered a declaration that expressed the futures that they envisioned for themselves in which they would experience safety, food security, education, peace and prosperity.

The UN Resident Coordinator Mr. Siddharth Chatterjee delivered the Secretary-General message which was also screened. Ms. Thoko Didiza, Representative from the Government of South Africa also gave her remarks. Other notable dignitaries who also gave their remarks are Ambassador Dr. Monic Juma, Kenya Cabinet Secretary of Foreign Affairs, H.E. Mr. Jean-Pierre Ossey Ambassador and Permanent Representative of the Republic of Congo, H.E. Mr. Marek...
Rohr-Garztecki, Ambassador of Poland, H.E Mrs. Marta Eugenia Juarez Ruiz, Ambassador and Permanent Representative of Costa Rica and H.E. Mr. Victor Conrad Ronneberg, Chair of the Western European and other States Group, Ambassador and Permanent Representative of Norway.

To mark 100 years since the birth of Nelson Mandela, a cake was cut. Different South African companies in Kenya exhibited their works at the main Lobby. As a gesture to commemorate the day and support for the girls’ education, Nissan company donated a car to Samburu Girls Centre Foundation- A rescue centre for girls based in Samburu County.

The colourful and successful event was jointly coordinated and organized by the United Nations Information Centre Nairobi and the South Africa High Commission in Kenya.

Cutting the cake marking the 100 years of Nelson Mandela Birthday.

The ongoing global movement for eliminating plastics is gaining momentum in Africa. Several countries have taken steps to eliminate the production and distribution of single-use plastics, some adopting a total ban on the production and use of plastic bags.

UN Environment and its partners are working closely with African governments to establish policies and create programmes that are geared towards a plastic-free continent. The campaign ‘Beat Plastic Pollution’ has mobilized the continent to come together and clean up plastics in land and water ecosystems. The campaign also encourages governments to adopt the initiative and come up with regulations to curb plastic pollution.

World Environment Day, celebrated on 5 June, heightened the urgency to rid Africa of plastics. Scores of people from across the continent participated in the day’s activities, which resulted in the collection of thousands of plastic bottles and tens of thousands of plastic bags.

Partnerships with governments, private sector companies and the general public are key to eliminate plastic pollution.

In Kenya for example, UN Environment has partnered with Safaricom and the National Environment Management Agency to establish an end-to-end plastic waste management programme.

Plastic debris blocking the main storm water retention pond at Nakuru Sewage Treatment Works. Credit: © James Wakibia
In Chemba Town, Tanzania, a group of young people turned plastic waste to their advantage with an innovative solution: they collected plastic bags and repurposed them into mattresses.

These are only a few examples of the strides being taken across Africa to rid the continent of plastic waste and turn this environmental challenge into an opportunity. Environmentally-conscious projects are picking up and will continue to develop with increased awareness on plastics, implementation of policies on environmental conservation and sustainability, as well as the channeling resources that go into research and innovative solutions.

UN Environment continues to play a key role in advocating for sound plastic waste management and environmental conservation, and in encouraging collaborative efforts and synergies to beat plastic pollution in Africa and beyond.

Every Child Counts - UNICEF supports the Government of Kenya to achieve Universal Health Coverage

President Uhuru Kenyatta carries baby Brandon at the launch held at the Kenya Medical Supplies Authority (HEMSA) in Nairobi, as the Cabinet Secretary for Health, Sicily Kariuki, looks on. Credit: © UNICEFKenya/2018/Serem
in Kenya and ensure improved immunization coverage for all children.

Through this initiative, USD 22 million has been injected into the health system to expand the vaccines cold chains supply system, provide medical equipment for maternal and neonatal health, as well as 20 vehicles and 48 motorbikes for county immunization outreaches.

In 2017, more than 500,000 children were not reached with lifesaving vaccines due to a nationwide nurses’ strike, alongside other challenges. This gap exposed the country, especially vulnerable and poor communities, to disease outbreaks such as Measles and Polio.

The Ministry of Health is working with UNICEF, WHO and other partners on a 100-day accelerated rapid results initiative to immunize all children who missed out on vaccinations. Speaking during the launch of the nationwide immunization campaign, the President said:

“It is a priority of my Government to promote and protect the health of our children. Indeed, the failure to immunize children will not only undermine their health and human dignity but will also occasion national risks such as disease outbreaks. I am therefore pleased to launch the National Rapid Results Initiative on child immunization which will increase the number of children that are immunized against killer diseases.”

UNICEF is a leading partner for the Ministry of Health in ensuring the survival and wellbeing of children and mothers. Together with WHO, UNICEF works to ensure quality and safe vaccines are made available at no cost in public health facilities. In addition to cold chain equipment, UNICEF has procured Maternal and Neonatal Health equipment, including ultrasound machines and patient monitors through funding from the World Bank.

The Deputy Representative to Kenya, Patrizia DiGiovanni says, “Every Child in Kenya has the basic right of being immunized. UNICEF is committed to the achievement of Universal Coverage for immunization and other high impact, low cost lifesaving maternal, newborn and child health interventions.”

The launch event held at the Kenya Medical Supplies Authority (HEMSA) brought together national
and county government officials, including Governors from several counties and the Cabinet Secretary for Health, Ms. Sicily Kariuki. Also in attendance were UN agencies, Non-Governmental Organizations, Civil Society and Medical Practitioners - all with a common agenda to promote the right to quality healthcare for every child.

This strategic partnership with the Government of Kenya marks a significant milestone by UNICEF, WHO, GAVI and the World Bank, in investing and building strong health systems that prioritize maternal, neonatal and child health, to keep every child alive.

UN Office of Counter Terrorism Lauds Kenya’s Prevention of Violent Extremism Efforts.

The UN Under Secretary-General of the United Nations Office of Counter-Terrorism (UNOCT) Mr. Vladimir Voronkov has commended Kenya’s progress in preventing violent extremism, especially in its focus on resilience-building for marginalized populations.

"Localization of preventing violent extremism (PVE) activities and innovative approaches in providing opportunities to the young population is one of the best practices of the UN system in Kenya," said Mr. Voronkov while concluding a visit to Kenya at the invitation of the Government on 31 July 2018.

Part of the mission of the high-level visit was to emphasise on "speaking with one UN voice" on counter-terrorism with increased coordination and coherence in United Nations technical assistance to Kenya and the region.
The delegation included Ms. Michèle Coninsx, Assistant Secretary-General and Executive Director of the Counter-Terrorism Committee Executive Directorate (CTED), Mr. Alexander Avanessov, Global Programme Manager and Special Advisor on Preventing of Violent Extremism, UN Development Programme, and a representative from the Security Council Monitoring Team.

The team held discussions with the Minister of Education, the Cabinet Secretary of Devolution, and high-level officials from the Ministry of Foreign Affairs, the Police, Defence, and the National Counter-Terrorism Centre.

They also met with representatives of the diplomatic community, as well as with the Acting Director-General of the UN Office in Nairobi, the UN Resident Coordinator, the UN Country Team, UN regional directors, and with local government officials and civil society organizations, including women’s groups, in Kwale county.

Discussions proposed areas for United Nations technical assistance, including border management, aviation and maritime security, support to returnees, capacity building for security forces, women empowerment in countering violent terrorism and vocational training for youth.

Big Four Agenda the focus as UNDAF 2018 - 2022 is launched

"Agenda 2030 is an ambitious global undertaking, and the Government appreciates the partnership with the UN in Kenya as we focus on promoting inclusive growth and sustainable management of natural resources in the next five years."

*Cabinet Secretary, Treasury
Henry Rotich

The UN in Kenya is increasing its support for the Government by about 80% over the next five years, as it seeks to help in the delivery of major national priorities under the new UN Development Assistance Framework (UNDAF).

UNDAF 2018 - 2022 was signed on 26 June 2018 by Treasury Cabinet

Continued from page 8
Secretary Mr. Henry Rotich, Cabinet Secretary for Devolution and ASAL Areas Mr. Eugene Wamalwa and the UN Resident Representative Mr. Siddharth Chatterjee.

Over 100 institutions were involved in review of the UNDAF, which is designed to support the government to deliver on the new Mid-term Plan III, the Big 4 and Vision 2030.

Between 2018 and 2022, the 21 specialized UN agencies as well as the World Bank and IMF based in Kenya will contribute about US$2 billion to implement the new UNDAF. The just-ended 2014-2018 had a budget of about US$1.2 billion.

“The support and assistance of the UN all our development partners is even more urgent and necessary now with the setting of the Big Four agenda”

Cabinet Secretary, Devolution Eugene Wamalwa

UNDAF 2018 - 2022 OUTCOMES

SRA 1: TRANSFORMATIVE GOVERNANCE

- By 2022, people in Kenya enjoy improved governance, access to justice, respect for the rule of law, human rights and gender equality
- By 2022 people in Kenya access high quality services at devolved level that are well coordinated, integrated, transparent, equitably resourced and accountable
- By 2022 People in Kenya live in a secure, peaceful, inclusive and cohesive society

“The new framework should help bring about further improvements in cooperation between the UN system, the EU diplomatic missions and development agencies in Kenya, and other development partners”

Head of Cooperation, EU Delegation to Kenya Hubert Perr

Continued from page 9

Continued on page 11
SRA 2: HUMAN CAPITAL DEVELOPMENT

• By 2022, children, youth and adults have increased access to inclusive and equitable quality and relevant education and training that integrates sports, culture and the arts and provides lifelong learning opportunities.

• By 2022, people in Kenya have increased and equitable access to and utilize quality health services including Sexual Reproductive Maternal Newborn Child Adolescent Health (SRMNCAH) in emergency and non-emergency settings.

• By 2022, increased proportions of girls and boys under 5 years and pregnant and lactating women have equitable access to and use quality nutrition specific and sensitive interventions.

• By 2022, management of population programmes and access to quality, affordable and adequate housing is improved in socially and environmentally sustainable settlements with focus on vulnerable groups.

• By 2022, individuals and communities in Kenya have reduced exposure to risks and are more resilient to disasters and emergencies.

• By 2022, all women, men and children in need, including key and priority populations, have equitable access to quality HIV prevention, treatment and care services.

• By 2022, an increased proportion of the population have access to sustainable and safe drinking water and sanitation, and practice appropriate hygiene behavior.

• By 2022, marginalized and vulnerable people have increased access to and utilize social protection, and services for prevention and response to gender-based violence and violence against children.

SRA 3: SUSTAINABLE ECONOMIC GROWTH

• By 2022, productivity in services sectors, agriculture, manufacturing, extractives blue economy and their value chains increased.

• By 2022, marginalized vulnerable groups and regions in Kenya have increased access to decent jobs, income and entrepreneurship opportunities.

• By 2022, people in Kenya benefit from sustainable natural resource management, a progressive and resilient green economy.

“We appreciate it when the UN comes together to do something as it reduces transaction cost and strengthens the impact”

Ruth Kaggia, Deputy Chief of Staff, Office of the President
UN-Habitat will provide support to the 1st ever global Sustainable Blue Economy Conference (SBEC) that will be held in Nairobi, Kenya from 26 - 28 November 2018 at the Kenyatta International Conference Centre (KICC).

The SBEC focuses on two pillars namely: (a) Sustainability, Climate Change and Controlling Pollution and (b) Production, Accelerated economic growth, Jobs and Poverty alleviation. Blue economy deals with water bodies and the economic activities around them including fishing, marine transport, extraction of minerals under the sea, among many others. UN-Habitat is getting involved mostly because of urban centres based on water fronts.

Speaking at the Pledging Session for the SBEC in Nairobi, attended by Kenya’s Foreign Affairs Cabinet Secretary Dr. Monica Juma and Environment Cabinet Secretary Mr. Keriako Tobiko, the Executive Director Mme. Maimunah Mohd Sharif announced that UN-Habitat’s support to the SBEC will include technical demonstration of innovative models that guide planning of coastal cities and towns and mobilization of Member States with coastlines, lakes and rivers to participate in the conference and to share their experiences. UN-Habitat will also mobilize experts in urban planning and design, municipal finance and
local economic development, urban basic services with experience of water-front planning and management to participate in the Blue Economy Conference in order to share their knowledge and experiences.

The Executive Director informed stakeholders at the Pledging Session that UN-Habitat has global experience and expertise in water-front planning, especially ocean, lake, and river water-front areas and that SBEC will provide a suitable platform for showcasing some of the water-front planning projects supported by UN-Habitat globally.

At country level, Executive Director made reference to the ongoing Kisumu Lakefront Planning and Redevelopment Initiative, a partnership between UN-Habitat and Kisumu County Government, that will result into a planned lakefront capable of attracting significant trade and investment opportunities in addition to extending the spatial boundaries of the City’s central business district. The Pledging Conference was also attended by the diplomatic community in Kenya, Private Sector Alliance, United Nations agencies, Academia and civil society.

Foreign Affairs Cabinet Secretary Dr. Monica Juma and Environment Cabinet Secretary Mr. Keriako Tobiko, the Executive Director Mme. Maimunah Mohd Sharif announced that UN-Habitat’s support to the SBEC will include technical demonstration of innovative models that guide planning of coastal cities and towns and mobilization of Member States with coastlines, lakes and rivers to participate in the (SBEC) conference and to share their experiences.
UNESCO organized an Information Session on Student Training on Entrepreneurial Promotion, called STEP Programme—bringing together STEP trainers from universities in Kenya, young beneficiaries of the programme, and representatives from the private sector and government, to discuss the advantages of scaling up STEP, to reach all 47 counties in Kenya and the wider Eastern Africa region, beginning with a pilot phase in Djibouti.

STEP was introduced in Kenya as a pilot in 2012, through a partnership involving the Kenya National Commission for UNESCO (KNATCOM) and its German counterpart, the German National Commission for UNESCO, along with Kenyatta University, as host institution responsible for conducting the training. The training, which initially targeted university students, and designed to equip them with entrepreneurial skills to enable them create jobs for themselves and their peers, has since 2014, been expanded to include out of school youth, working in partnership with county governments.

Kenyatta University, Mount Kenya University and Strathmore University, highlighted the beneficial outcomes of enrolling in the programme, aimed at equipping students with entrepreneurial skills, confidence and soft skills to set up businesses and effectively manage start-ups in their respective counties.

Interest from Kenya Commercial Bank (HCB) Foundation, sparked conversations around the importance of public-private partnerships, and the need to work together to tackle youth unemployment, not only in Kenya, but also in the wider Eastern Africa region.

By the end of the session, participants made a commitment to establish a Sector Working Group on Youth, and in particular on STEP, comprising stakeholders from government, universities, youth organizations, private sector and development partners, etc., to, among others, work towards upscaling and mainstreaming the programme, and tackling youth unemployment in Kenya through entrepreneurial skills building and development.

The UNESCO Better Education for Africa’s Rise (BEAR) II is a five-year joint initiative managed technically by UNESCO and funded by the Republic of Korea. Following extensive consultation in formulating the project to correspond to national needs, BEAR II is currently in its ‘Inception Phase’. The objectives of the inception phase are as follows: to deepen understanding of the objectives of the project among national stakeholders, to enhance the level of participation and ownership of the project and to develop an implementation plan for the coming years.

The government of Kenya, in cooperation with UNESCO, organized a launch ceremony and an inception workshop in Nairobi, from 19 to 20 June 2018 at the Kenya School of Monetary Studies (KSMS). The event brought together government representatives and key stakeholders in the Technical and Vocational Education and Training (TVET) sector as well as in the target sector of intervention i.e. environmental technology.

During the inception workshop, an overall plan of the project and an operational work plan to guide project implementation were developed and validated. Key structures and processes were set up to facilitate the implementation of the project.

More about BEAR II: The Better Education for Africa’s Rise Project (Phase II) is working to update curricula, better train teachers, rebrand the image of TVET, boost infrastructure and engage employers and enterprises to help create more comprehensive TVET Systems in Eastern Africa (Ethiopia, Kenya, Madagascar, Tanzania and Uganda). BEAR II interventions focus on improving the quality, relevance and perception of TVET in specific sectors carefully chosen for their potential for job creation. The ultimate aim of the project is to promote quality TVET systems and to give young people a better chance of finding jobs.
Three East African countries are participating in the World Heritage Volunteers Campaign 2018 - Empowering the Commitment to World Heritage, through six conservation projects that will be carried out at World Heritage sites (and World Heritage Tentative List sites) in collaboration with the Coordinating Committee for International Voluntary Service (CCIVS). The World Heritage Volunteers (WHV) Initiative was launched in 2008 to mobilize and involve young people and youth organizations in World Heritage preservation and promotion, thus increasing awareness of the 1972 Convention Concerning the Protection of the World Cultural and Natural Heritage at the local and global levels. The volunteer projects are being implemented in partnership with local institutions, the National Commissions for UNESCO, the World Heritage Centre and the UNESCO Regional Office for Eastern Africa.

This year’s campaign consists of 53 projects related to 52 heritage sites in 29 countries. In Kenya, the World Heritage Volunteers campaign has projects in the Africa Great Rift Valley - the Maasai Mara, Kakamega Rainforest, a project on the Isukhuti Dance and in the Sacred Mijikenda Haya Forests.
“These projects provide young people in Eastern Africa with an opportunity to learn about World Heritage sites, about the history and traditions of their own and other cultures, about ecology and the importance of protecting biodiversity,” said Ms. Ann Therese Ndong-Jatta, Director of the UNESCO Regional Office for Eastern Africa. “By volunteering at heritage sites, they become aware of the threats facing the sites and learn how the international community as a whole unites to save our common heritage. Most importantly, they discover how they can contribute to heritage conservation and make themselves heard,” she added.

Through engaging youth in these and other fruitful interactions, UNESCO intends to strengthen young people’s appreciation and respect of cultural and natural heritage. The World Heritage Volunteers Programme is part of the World Heritage Education Programme, which also organizes global and regional youth forums, produces educational videos entitled “Patrimonito’s World Heritage Adventures”, and offers World Heritage curriculum through the "World Heritage in Young Hands Kit", which is available in 37 languages.

Development of the University of Nairobi Health Application

UNESCO trained 20 University students from colleges of Engineering, Computing and Health Sciences on mobile application development on harm reduction, in the two-day workshop, as a build-up activity for this year’s celebrations for the International Day against Drug and Illicit Trafficking in Kenya. The training encompassed a brainstorming session, hands-on presentations, demonstrations and coding sessions by the resource person, individuals and groups in various activities. The application aims to reach out to over 80,000 regular university students with information on HIV and AIDS, Sexual and Reproductive Health and drugs and substance abuse.

By the end of the training, the students developed 4 prototypes covering 4 main themes namely HIV and AIDS prevention, treatment, care and support, alcohol and drug abuse.
Kenya’s Thimlich Ohinga Archaeological Site gains World Heritage status, bringing the number of World Heritage sites in Kenya to seven
managed by the National Museums of Kenya (under the National Museums and Heritage Act of 2006) in collaboration with the local community.

"With the inscription of Thimlich Ohinga, Kenya has a chance to showcase this outstanding heritage: an embodiment of prominence and permanence" said Dr. Hoseah Wanderi, a research scientist at the National Museums of Kenya, and the national focal point for the development the World Heritage nomination dossier.

During the same session, the World Heritage Committee inscribed Lake Turkana National Parks (Kenya) on the List of World Heritage in Danger in Decision 42 COM 7B.92. This decision was made due to the disruptive effects of the Gibe III Dam and Kuraz Sugar Cane development projects in Ethiopia on the flow and ecosystem of Lake Turkana.

In its Decision for Lake Turkana, the Committee reiterated its recommendation made during its 40th session for the commissioning of a Strategic Environmental Assessment (SEA) to evaluate the cumulative impact of the development projects in the Lake Turkana basin on the Outstanding Universal Value (OUV) of the affected property. The SEA will be used as a mechanism to assess the negative impacts of the developments and identify mitigation measures, to ensure sufficient water flow into the lake for conservation of its biodiversity and ecosystem.

There are currently 1092 natural and cultural heritage properties inscribed on the UNESCO World Heritage List; 95 of which are in the Africa Region. There are 54 properties inscribed on the List of World Heritage in Danger, of which 16 are located in the Africa Region.

African pastoralists and meteorologists need each other to tackle climate change

For many Africans, climate impacts are a life and death matter. Those who rely on pastoralism have the benefit of their mobility. Their traditional knowledge can help them forecast precise or general patterns of weather and

Continued from page 17
climate.

UNESCO’s Local and Indigenous Knowledge Systems programme convened an African expert meeting on indigenous knowledge and climate change in Nairobi, Kenya, 27 and 28 June 2018. African indigenous pastoralists groups, meteorologists and policy specialists from West and East Africa and from international agencies gathered to improve knowledge sharing for better policymaking and climate change national adaptation strategies.

The pastoralists included elders and community researchers from Chad, northeast Ethiopia, northern Kenya, northern Tanzania, northern and southern Uganda - all of which are prone to extreme weather events and protracted droughts.

As take-aways from the meeting, the importance of respecting indigenous and local knowledge about weather and climate change was underscored, as well as the need for indigenous populations to continue working with the science community to tackle jointly the impacts of climate changes. Indigenous populations should be part of a weather and climate observatory to help national climate adaptation. Knowledge about adaptation strategies and practices need to be strengthened thanks to the invaluable contributions of the indigenous populations. This will ensure resilience of communities and strengthening of risk-adaptation planning.

The aim of the UNESCO projects is that pastoralists and meteorologists in Africa understand how their respective knowledge systems can work together to predict weather better, to improve decision-making, which reduces risks, to protect lives and to protect the environment. As African develops its National Adaptation plans (NAPs), there is an opportunity to involve indigenous and rural communities as knowledge holders and experts.
